design01

Classically puristic. An archetype.

design01 restricts itself to the essentials. A guarantee of incomparable writing pleasure. Classical, discreet, timeless in design. Flawlessly executed with the finest materials. Puristic, yet with a strong optical depth effect. Multiple polished layers of varnish give these writing instruments their intense coloration and an unmistakable shine.

STERLINGSILVER
MADE IN GERMANY

Caps are made of sterling silver or coated with rose gold and are available in smooth or guilloché striped designs. The hardware components are coated with high-grade platinum. Available as fountain pen, roller ball, ballpoint, and retractable pencil.

Black & blue

The body of the design01 is made of copper, painted with four high-grade coats of black or blue. Each surface is then polished by hand after every coat.

STERLING SILVER
MADE IN GERMANY

Smooth, striped, and honeycomb guilloché design02 has a solid silver body that rests confidently in the hand. The hardware components are coated with high-grade platinum, guaranteeing a durable surface finish. The writing instruments are polished by hand using a special technique from the jeweller's art.

Three surface finishes: smooth, stripes, and honeycomb guilloché. The smooth design is also available as a bicolor version, offered with an accompanying bicolor steel nib. Available as a fountain pen, rollerball pen, ballpoint pen, and mechanical pencil.

STERLING SILVER
MADE IN GERMANY

Striped guilloché & Princess Cut

The barrels are made of solid sterling silver, the hardware components are platinized. The striped guilloché is double-cut. For the Princess Cut, a total of eighty individual lines intersect. One special feature is the mechanical spring clip: precisely machined from solid brass and finished with a platinum coating.

Black, platinum, flowers & creme, ruthenium flowers

The flower pattern is produced by laser engraving. Several coats of paint provide a brilliant surface. Each writing instrument is plated with platinum, finished with lacquer, ground, and polished by hand.

Black uni & creme uni

The barrels are lacquered with several color and clear coats. They are then ground and polished by hand. The caps for the fountain pen and roller ball are coated with platinum.

Black check & creme check

The barrels have a checkered guilloché pattern. They are then lacquered with several color coats and a final matte finish. The caps for the fountain pens and roller ball pens are coated with platinum.

Black uni with rose gold

The barrel is coated with rose gold. The barrels are acquired with several color and clear coats. They are then ground and polished by hand. The caps for the fountain pens and roller ball pens are also decorated with rose gold.

Black & white wave with rose gold

After applying a coat of black or white colored enamel, the three-dimensional guilloché pattern is added with waves that vary in depth. These are coated with rose gold, followed by several more layers of enamel, and then sanded and polished after every order.

Wave blue, black & white

The multilayered black or white coating serves as a primer for the subsequent guilloché. Three-dimensional lines are cut into the color lacquer, which vary in depth. The waves are coated with palladium and then several layers of lacquer are added, and ground and polished after every coat.

Code

The brass body is polished to a high gloss and coated with palladium. The black lacquer finish is lasered to produce a graphic pattern. Another palladium coating and several coats of clear lacquer, then ground and polished by hand.

Sand

The brass barrel has a fine satin finish. It is then coated with palladium and a special sand-colored lacquer and matte finish. More lacquer coats are applied, ground, and polished by hand.

design05

Functionality. In perfection.

design05 is an elegant companion for your every day. Noble design. Compact and well-proportioned. With double functions. A replaceable „touch tip“ can used for smart phone or tablet entries. The materials are typical for Otto Hutt: the highest quality, flawlessly finished. A complex mechanical clip and precise ink-guidance system speak for themselves.

Black, blue, green, & yellow

The solid brass body is plated with platinum and given a satin finish. The cap has a checkered guilloché and several coats of color lacquer. The final high-grade matte lacquer finish makes this model particularly pleasant to grip.

Rose gold

The brass body is plated with rose gold with a fine satin finish. The barrels have a checkered guilloché with several coats of lacquer.

Platinum

The body is solid copper with a satin finish and platinum plating. The matte surface provides an especially pleasant grip.

design06

Natural expression. Moving forward.

design06 has a perfectly organic form. Its supple feel shows the way forward. A renowned original meets innovation. Proven quality meets elegance. New contours and surfaces milled with special diamond tools. Merged into an overwhelmingly natural composition.

Black, red, rose & white

Shaft and cap are made of solid aluminum. The complex spring clip is organic in form and perfect in function. Steel and gold nibs are available for the fountain pen. The hardware components of the black and red models are plated with platinum.

The hardware components of the rose and white models are plated with attractive rose gold. A special final lacquer coat produces an especially pleasant feel. Available as fountain pen, ballpoint, and roller ball.

Design your own.

Unique writing instrument. Infinite possibilities.

The configurator gives those who are looking for something special the ability to design their personal writing instruments just the way they want them. Hundreds of possible combinations make every fountain pen a truly unique piece.

Based on the design06, fans of writing instruments can select various decorations, colors, and even individual components to be combined as desired. The configurator is available online or at retail specialty shops.

Seven different colors are available for the body and cap:

arctic blue, lavender violet, orchid violet, ruby red, blush red, seashell pink, ash grey.

Designs can be merged with the following decorations:

Platin, Gold, Rosé-Gold, Aubergine.

Individuality

A 6-digit code engraved in the cap makes every writing instrument a unique piece. Personally engraved upon request.

Variety

Seven different colors are available for the body and cap. Designs can be merged in any combination. Available as fountain pen, ballpoint, and roller ball.

design07

The flagship. Top class.

design07 is the very essence of artistic perfection. Form and functionality are combined in an energetic body. A bow to the beauty of clean shapes. Strong and elegant. The unmistakable idea of top-class character outshines the rest. With a characteristic spring clip, masterfully developed into a consummate design.

Silver

Shaft and cap are made of sterling silver. The fountain pens have a unusually large, high-quality gold nib. The characteristic spring clip has been further refined for design07. A special highlight: the finely worked thread guilloché on the shaft and cap.

Lacquer

Shaft and cap are made of solid brass and then platinized. Here again the shaft and cap have especially finely worked thread guilloché. A double coat of black translucent lacquer is followed by seven clear coats. Ground multiple times and polished by hand. Both variants are available as a fountain pen and a roller ball pen.
